

C- THE EVALUATION PROCESS

Preliminary Remarks to the Veterinary Check Card

The commission agreed that every young horse should get vet-checked at least on the occasion of its first evaluation.

As in the breeding organisation there are different opinions and rules about acceptance of torsion of testicles, the commission recommends urgently that a note about diagnosed accepted torsion of testicles should be made on the evaluation card of a stallion.

This is in order to prevent the possibility of a stallion being sold into a breeding region with different rules.
